## **Support for FICA Deferment Deduction for 2020**

## APTAWEB-10893

HARRIS School Solutions

In August 2020, the President signed an executive action allowing for the deferment of Social Security Tax (FICA) between September 1, 2020 and December 31, 2020 because of the COVID-19 pandemic. As a result, AptaFund has created a way to support this deferment. Please note that this is **optional**, and that it is **universal** for all employees on a database (i.e., *all* employees will have the FICA deferment, or *none* will).

The deferment limits the application of the provision to individuals with gross pay in a pay period that is less than the equivalent of \$4,000 for a bi-weekly pay period, which would work out to an annual payroll of \$104,000. It also provides that no penalties, interest, or additions to tax would apply to these deferred payments.

## However, employees are expected to pay this deferment back in 2021.

In order to support this, AptaFund has created a new deduction in the Manage Deductions screen called "FICA Deferment". Since the deduction is optional, it is disabled by default, so it will need to be enabled in order for the deferment to work. Before enabling the deduction, be sure to choose the same vendor that is used for the regular FICA deduction, as well as the same Expenditure and Liability Element Values/Account Masks.

Figure 1: FICA Deferment Deduction in Manage Deductions

Once this is set up in Manage Deductions, and the deduction is enabled, employees will see the "FICA Deferment" on their pay stubs. This amount will generally reverse their FICA deduction for the pay periods between September and December 2020. The YTD amount is important, as this is the amount that the employee will likely **need to pay back** after the deferment is over. Also, please note that the deferment does not apply to the employer contribution, which is why there is no amount on the paystub in the "Employer Contribution" column for the FICA Deferment deduction.

Figure 2: FICA Deferment Deduction on Employee Paystub

If an employee earns more than \$104,000 of FICA earnings in a year, the FICA Deferment will decrease once they reach that point. As in any calendar year, once an employee reaches the FICA Wage Limit (which in 2020 is \$137,700), all FICA contributions stop.

Finally, when paying payroll liabilities, make sure to include both the FICA and FICA Deferment deductions on the payroll voucher. This will ensure that the proper amount is paid to the vendor.
