

Harris School Solutions has an issue tracking system to monitor program enhancements and defects. The reference numbers below refer to the issues in that system that were resolved in this release.

Technical Documents

Issues with the **See Tech Doc** notation have technical documents available on the Release Pop-Up and Help Guide. Issues with the  notation denotes this issue was a Customer Idea taken from the Idea Portal.

New Features

Purchasing

APTAFUND-4439

Purchase Orders: Per an idea in the Idea portal, you can now close multiple open purchase orders at once, making fiscal year-end cleanup faster and easier. When a close reason is required, you will be prompted to enter it during the bulk close action, and you can review the result for each selected purchase order after the action is completed. 

Budget Requisitions

AFD-814

Budget Requisitions: Due to client requests for flexibility of workflow, you can now choose what happens to approved budget requisitions when a budget is adopted. A new system configuration setting lets you create purchase requisitions, create purchase orders, or take no action, and the budget adoption confirmation message now explains the action that will occur when applicable.  **See Tech Doc**
